

Congratulations! You have done the hard part & chosen a style, comfort & size that suits you. We aim to make your furniture within the time frame stated on your order.

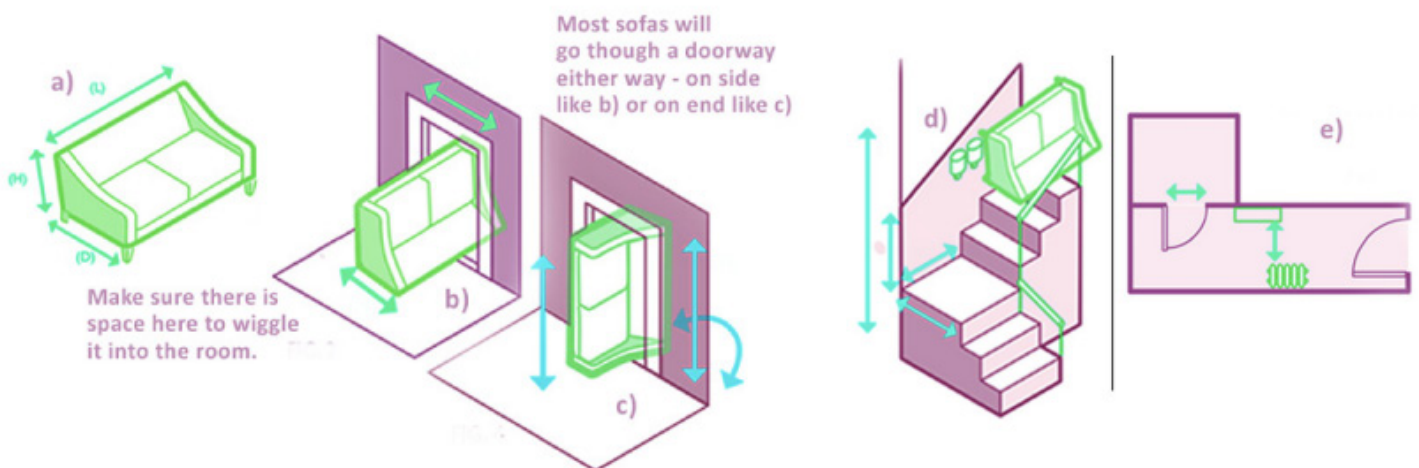

Each piece is made to order individually for each customer. We only make the furniture, we cannot guarantee it will fit. We use a third party Carrier Company who are experienced in home furniture deliveries however they are not magicians.

Customers need to ensure there is adequate access to install the furniture

& that the size of the sofa will fit in its designated space and through doorways & hall space.

It is important that there is space either side of your doorways & access routes to allow our carriers room to manoeuvre the sofas.

The carrier Company will make every effort to place your pieces in your specific room if this is possible. However we cannot accept liability for any occurrences that might take place on site. See below for issues to look out for.

Here are considerations to keep in mind:

- Ascending stairs.
- Navigating through narrow corners.
- Ensuring adequate space to move sofas through hallways and access areas.
- Checking if your furniture suite exceeds standard door dimensions (2m in height or width), or if there are small doorways.
- Identifying any fixed obstacles such as light fixtures, radiators, or cabinets.
- Verifying if the driveway is spacious enough for a delivery truck, typically the size of our delivery vehicles.
- Confirming that doors can fully open and, if necessary, be removed prior to delivery.
